Ancell

Monoclonal anti-human TCR Cβ*

mAb name/Clone: JOVI-1 *Isotype:* Mouse IgG2a

Immunogen: Human HA1.7 TCR β chain expressed on transgenic mouse cells

CATALOG#: 101-820 (Preservative-free)

QUANTITY: 100 μg CONCENTRATION: 1.0 mg/ml

INFORMATION: Human T cell receptor (TCR) is a T cell surface expressed heterodimer of α/β or γ/δ chains. TCR's recognize antigen peptides bound to MHC molecules forming the basis of antigen specific response by T cells.

Antibody JOVI-1 recognizes human C β 1 TCR gene product and reacts with 50-75% of T cells in normal human blood. Antibody JOVI-1 is mitogenic for T cells expressing TCR C β 1.

STORAGE CONDITIONS: *Store at 2 - 5^oC*. Freeze/Thawing is not recommended. **Open under aseptic conditions.**

PRODUCT STABILITY: Product should retain activity for at least 12 months after shipping date when stored as recommended. Ship Date:______

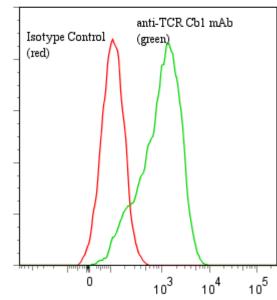

BUFFER: 50 mM Sodium Phosphate pH 7.5, 100 mM Potassium Chloride, 150mM NaCl.

PRODUCTION: Antibody was Protein A purified from (low FBS containing) tissue culture supernatant. Purity was >95% Immunoglobulin by SDS-PAGE and contains less than 1% Bovine Immunoglobulin. Product was 0.2

μm filtered and vialed under aseptic conditions.

PERFORMANCE: Five x 10^5 cultured **Jurkat** cells were washed and incubated 45 minutes on ice with 80 μl of anti-TCR Cβ1 at **5 μg/ml**. Cells were washed twice and incubated with 2^0 reagent as described above, after which they were washed three times, fixed and analyzed by FACS. Cells stained positive with a mean shift of **1.03** log₁₀ fluorescent units when compared to a Mouse IgG2a negative control (Catalog #281-010) at a similar concentration.

Binding of anti-TCR Cb1 mAb +GAM/FITC to human Jurkat cells

^{*} Research Use Only. Not for use in Diagnostic procedures.
