

PERFORMANCE DATA SHEET

1818

Monoclonal Mouse IgG1 F(ab')₂****Clone: MOPC 31C*****CATALOG#: 278-520****QUANTITY: 100 µg****CONCENTRATION: 1.0 mg/ml**

INFORMATION: Immunoglobulin expressed by the mouse plasmacytoma MOPC 31C is an IgG1κ isotype of unknown specificity. It is used as a negative control when working with human cells.

STORAGE CONDITIONS: *Store at 2 - 5°C.* Freeze/Thawing is not recommended.

PRODUCT STABILITY: Product should retain activity for at least 12 months after shipping date when stored as recommended. Ship Date: _____

BUFFER: 50 mM Sodium Phosphate pH 7.5, 100 mM Potassium Chloride, 150mM NaCl. Product was sterile filtered and vialled under aseptic conditions. **No preservative added.**

PRODUCTION: Antibody was Protein A purified from (low FBS containing) tissue culture supernatant. Immunoglobulin was enzymatically cleaved using Immobilized Ficin. F(ab')₂ was separated from intact antibody and Fc fragments by Protein A and Size exclusion chromatography. No intact antibody was observed by SDS-PAGE.

PERFORMANCE: Mouse IgG1 F(ab')₂ was tested as a negative control in Flow cytometry at 20 µg/ml using Goat anti-Mouse IgG/FITC (Cat # 232-010) as a 2^o reagent. All cells tested failed to stain or display a significant mean shift above a buffer background.

Cells tested: Human PBL, CEM, HPB-MLT, Nalm-6, Jurkat, KG-1, U937, Molt-4, and Raji (cells were pre-incubated with human IgG to block nonspecific binding). (fx040616)

****Research Use Only. Not for use in Diagnostic procedures.***
