

## PERFORMANCE DATA SHEET

2342

### *Monoclonal Mouse IgG2a F(ab')<sub>2</sub>\**

*Clone: RPC 5*

**CATALOG#:** 281-520

**QUANTITY:** 100 µg

**CONCENTRATION:** 1.0 mg/ml

**INFORMATION:** Immunoglobulin expressed by the mouse plasmacytoma hybridoma RPC 5 is an IgG2a isotype of unknown specificity. It is used as a negative control when working with human cells

**STORAGE CONDITIONS:** *Store at 2 - 5°C.* Freeze/Thawing is not recommended. Open under aseptic conditions.

**PRODUCT STABILITY:** Product should retain activity for at least 12 months after shipping date when stored as recommended. Ship Date:\_\_\_\_\_

**BUFFER:** 50 mM Sodium Phosphate pH 7.5, 100 mM Potassium Chloride, 150mM NaCl. Product was sterile filtered and vialled under aseptic conditions. **No preservative added.**

**PRODUCTION:** Antibody was Protein A purified from (low FBS containing) tissue culture supernatant. Immunoglobulin was enzymatically cleaved using Immobilized Pepsin. F(ab')<sub>2</sub> was separated from intact antibody and Fc fragments by Protein A and Size exclusion chromatography. No intact antibody was observed by SDS-PAGE.

**PERFORMANCE:** Mouse IgG2a F(ab')<sub>2</sub> was tested as a negative control in Flow cytometry at 20 µg/ml using Goat anti-Mouse IgG/FITC (Cat # 232-010) as a 2<sup>o</sup> reagent. All cells tested failed to stain or display a significant mean shift above a buffer background.

**Cells tested:** Human PBL, HPB-MLT, Nalm-6, Jurkat, and Raji.

*\* Research Use Only. Not for use in Diagnostic procedures.*
