

PERFORMANCE DATA SHEET

2334

Monoclonal anti-human CD94 (Kp43)*

mAb name/Clone: HP-3D9

Isotype: Mouse IgG1

Immunogen: Cultured human NK cells

CATALOG#: 315-020

QUANTITY: 100 µg

CONCENTRATION: 1.0 mg/ml

INFORMATION: Human CD94 expression is restricted to natural killer (NK) cells and a small subset of T lymphocytes. CD94 is a type II membrane glycoprotein of the c-type lectin superfamily and essentially lacks a cytoplasmic tail. Antibody HP-3D9 recognizes the CD94 molecule of 70 kd. Antibody HP-3D9 inhibits IL-2 dependent proliferation of NK cells.

STORAGE CONDITIONS: Store at 2 - 5°C. Freeze/Thawing is not recommended.

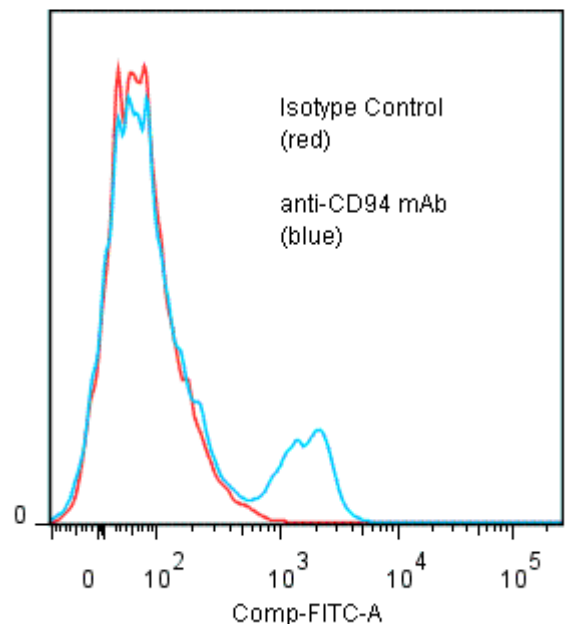

PRODUCT STABILITY: Product should retain activity for at least 12 months after shipping date when stored as recommended. Ship Date: _____

BUFFER: 50 mM Sodium Phosphate pH 7.5, 100 mM Potassium Chloride, 150mM NaCl, 0.5 mg/ml Gentamicin Sulfate (as a preservative).

PRODUCTION: Antibody was Protein A purified from (low FBS containing) tissue culture supernatant. Purity was >95% Immunoglobulin by SDS-PAGE and contains less than 1% Bovine Immunoglobulin.

PERFORMANCE: Ficoll prepared human peripheral blood mononuclear cells were pre incubated ~10 minutes with 20ul of 300 ug/ml human IgG (to reduce non specific binding), after which they were incubated 45 minutes on ice with 80 µl of anti-CD94 antibody at a concentration of 5 µg/ml. Cells were washed twice and incubated with 2^o reagent Goat anti-Mouse IgG/FITC (Catalog #232-011), after which they were washed three times, fixed and analyzed by FACS. A net 15% sub population of the cells stained positive with a mean shift of 1.27 log₁₀ fluorescent units when compared to a Mouse IgG1 negative control (Catalog #278-010) at a similar concentration.

Binding of anti-CD94 mAb +GAM/FITC to human PBMC

**Research Use Only. Not for use in Diagnostic procedures*
