

PERFORMANCE DATA SHEET

1818

Monoclonal anti-human CD45RA *

mAb name/Clone: 158.4D3

Isotype: Mouse IgG2a

Immunogen: Stimulated human leukocytes

CATALOG#: 394-020

QUANTITY: 100 µg

CONCENTRATION: 1.0 mg/ml

INFORMATION: Human CD45RA is expressed on all cells of hematopoietic origin, except erythrocytes. CD45RA is a transmembrane tyrosine phosphate which can exist in at least nine different isoforms resulting from tissue-specific alternative RNA splicing of exons 4-7 of a single gene coding for the various N-terminal peptide segments. The CD45RA isoform predominates on naive/resting T cells and medullary thymocytes. Antibody 158.4D3 recognizes all CD45 molecules containing the A region exon (1,2).

STORAGE CONDITIONS: Store at 2 - 5°C. Freeze/Thawing is not recommended.

PRODUCT STABILITY: Product should retain activity for at least 12 months after shipping date when stored as recommended. Ship Date: _____

BUFFER: 50 mM Sodium Phosphate pH 7.5, 100 mM Potassium Chloride, 150mM NaCl, 0.5 mg/ml Gentamicin Sulfate (as a preservative).

PRODUCTION: Antibody was Protein A purified from (low FBS containing) tissue culture supernatant. Purity was >95% Immunoglobulin by SDS-PAGE with less than 1% Bovine Immunoglobulin.

PERFORMANCE: Five x 10⁵ cultured human **Raji** cells were incubated 45 minutes on ice with 80 µl of anti-CD45RA antibody at 5 µg/ml. Cells were washed twice and incubated with 2^o reagent Goat anti-Mouse IgG/FITC (Catalog #232-011), after which they were washed three times, fixed and analyzed by FACS. Cells stained positive with a mean shift of 1.86 log₁₀ fluorescent units when compared to a Mouse IgG2a negative control (Catalog #281-010) at a similar concentration.

**This Product is intended for Laboratory Research use only.*

Binding of anti-CD45RA antibody to human cell lines
