## Human CD152(CTLA-4)-muIg/R-PE *Fusion Protein\** (also binds to mouse CD80/CD86)

**CATALOG#:** 501-050

**QUANTITY:** 50 tests

**VOLUME IN VIAL:** 200 µl

**WORKING DILUTION:** 1:20 (or use 4 ul of concentrated stock per 5 x 10<sup>5</sup>-cell test)

**Molecular Structure:** A soluble 110 kd dimeric fusion protein consisting of the extracellular (125aa) domain of human CD152 (CTLA-4) fused to murine IgG2a Fc

**Transfectant Cell Line:** BHK

**INFORMATION:** Immune response mediated by T cells can be characterized to functionally proceed as follows: antigen recognition by the T cell receptor, activation through costimulation, effector activities to eliminate antigen and finally down regulation. Human CD152 is a cell surface glycoprotein expressed at low levels on activated T cells. CD152 is a high affinity receptor for the costimulatory molecules CD80 (B7-1) and CD86 (B7-2) and appears to function as a negative regulator of T cell activation. Therefore, CD152 may be an important player in down regulating T cell mediated immune responses. The CD152 Ig fusion protein has biological activity and binds with high affinity to human or mouse CD80 (B7-1) and CD86 (B7-2). CD152 Ig will block the binding of anti-CD80 (B7-1) and anti-CD86 (B7-2) monoclonal antibodies.

Fass, et al, (2000) J Immunol **164**: 6340-6348.

**STORAGE CONDITIONS:** Store at 2 - 5°C. Freeze/Thawing is not recommended. Protect from light.

**PRODUCT STABILITY:** Product should retain activity for at least 12 months after shipping date when stored as recommended. Ship Date: \_\_\_\_\_

**BUFFER:** 50 mM Sodium Phosphate pH 7.5, 500 mM Potassium Chloride, 150mM NaCl, 15% Glycerol, 0.2% BSA, 0.04% NaN<sub>3</sub> (as a preservative)

**PRODUCTION:** Human CD152-muIg fusion protein from tissue culture supernatant of BHK transfectants was Protein A purified to >95% by SDS-PAGE (<1% bovine immunoglobulin), and conjugated to R-Phycoerythrin through a sulfo-ester linkage. Unconjugated fusion protein was removed using size exclusion chromatography. CD152-muIg/R-PE conjugate is at **0.2 mg/ml** with an A<sub>565</sub>/A<sub>280</sub> ratio of 3.97.

**PERFORMANCE:** Five x 10<sup>5</sup> cultured **Raji** human tumor cells were washed and incubated 45 minutes on ice with 80 µl of CD152-muIg/R-PE at a dilution factor of **1:20** (10 µg/ml). Cells were washed three times, fixed and analyzed using by FACS. The cells stained positive with a mean shift of **2.05 log<sub>10</sub>** fluorescent units when compared to a Mouse IgG2a/R-PE negative control (Catalog # 281-050). Binding was blocked when cells were pre incubated 10 minutes with 20 µl of 0.5 mg/ml un conjugated CD152-muIg (cat #501-020).

**\* Research Use Only. Not for use in Diagnostic procedures.**

### Binding of recombinant CD152-muIg/PE to human Raji cells
